## MATERIAL SAFETY DATA SHEET

DMS 2055

To the Purchaser: This MSDS contains important environmental, health and toxicology information for your employees who have ordered this product. Please be sure this information is given to them. If you resell this product, a copy of this MSDS should be given to the buyer.

MANUFACTURER'S NAME  
Ferro Corporation, Composites DivisionEMERGENCY PHONE NO.  
(216) 641-8580 EXT 235ADDRESS (number, street, city, state, & zip code)  
3512 Helms Avenue, Culver City, CA 90230

DMS 2055 / TYPE 1, GEA A

## SECTION 1

## CHEMICAL NAME &amp; SYNONYMS

Phenol-Formaldehyde Prepreg/Glass

## TRADE NAME &amp; SYNONYMS

CPH-2207/Woven Glass

CHEMICAL FAMILY  
Phenolic ResinCAS NUMBER  
9003-35-4FORMULA (C<sub>6</sub>H<sub>6</sub>O•CH<sub>2</sub>O)<sub>x</sub>

## SECTION II

OSHA POTENTIAL HAZARDOUS SUBSTANCE  
IDENTIFIED WITH AN: (HAZ) BEFORE THE NAME

COMPOSITION	%	SPEC.	LD <sub>50</sub>		LC <sub>50</sub>	
			ORAL	DERMAL	CONC.	HOURS
(HAZ) Phenol-Formaldehyde Resin Polymer	32-55		See Section V			
(HAZ) Woven Fiberglass	45-68				LC <sub>Lo inh</sub> -hmn	
					300 ug/m <sup>3</sup>	10 yrs

## ADDITIONAL INFORMATION

Toxicological information from NIOSH Registry of  
Toxic Effects of Substances

## SECTION III PHYSICAL DATA

BOILING POINT (°F.) -Resin will cure before boiling	N/A	SPECIFIC GRAVITY (H <sub>2</sub> O=1)	~ 1.9
VAPOR PRESSURE (mm Hg.) at 25°C	< 1	PERCENT VOLATILE BY VOLUME (%) 10 min/325 °F	3-9
VAPOR DENSITY (AIR=1)	> 1	EVAPORATION RATE (N BuAc =1)	< 1
SOLUBILITY IN WATER	Negligible		

APPEARANCE &amp; ODOR Amber to black color, at ambient temp. a light formaldehyde odor

## SECTION IV FIRE &amp; EXPLOSION HAZARD DATA

FLASH POINT (method used) uncured material U.C. > 350°F	FLAMMABLE LIMITS	LeI N/A	UeI N/A
EXTINGUISHING MEDIA	CO <sub>2</sub> , dry chemical, foam, water fog		

## SPECIAL FIRE FIGHTING PROCEDURES

Combustion will give off toxic products, use self-contained breathing apparatus.

UNUSUAL FIRE & EXPLOSION HAZARDS Airborne dusts produced from grinding or cutting of the cured prepreg resin may ignite if exposed to an ignition source. Keep this work away from sources of ignition. Ground equipment to prevent static electricity.

ADAPTED FROM FORM OSHA-20

N/A = NOT APPLICABLE

## SECTION V HEALTH HAZARD DATA

**INHALATION EXPOSURE LIMIT** Organic vapor; recommend ACGIH TLV: 2 ppm (3 mg/m<sup>3</sup>) based on formaldehyde; Nuisance dust OSHA Standard PEL: 10 mg/m<sup>3</sup>

**EFFECTS OF OVEREXPOSURE** Dust and vapor are mild pulmonary and eye irritants. Long term breathing of the dusts can damage the lungs. Some workers may become sensitized from either breathing vapors from, or skin contact with the uncured resin. Vapors may cause asthmatic condition in sensitive workers, where there is poor ventilation. Contact dermatitis could result from repeated handling with unprotected skin. Ingestion, the material is considered to be of minimal toxicity.

**EMERGENCY AND FIRST AID PROCEDURES** Respiratory irritations and headaches-person should be moved to fresh air and referred to a physician. Eye contact - must be flushed immediately with large quantities of water, medical attention should be obtained without delay. Ingestion, dilute with milk or water, induce vomiting, call a physician. Skin irritation - remove person from the causative source, thoroughly wash with soap and water after contact. If irritation persists for several days, seek medical treatment from a physician competent in industrial health.

## SECTION VI REACTIVITY DATA

STABILITY	UNSTABLE		CONDITIONS TO AVOID
	STABLE	X	
INCOMPATIBILITY (Materials to avoid) For the uncured resin, strong acids or alkalis, strong oxidizing agents.			
HAZARDOUS DECOMPOSITION PRODUCTS Phenol, methyl phenols, carbon monoxide, carbon dioxide, aldehydes			
HAZARDOUS POLYMERIZATION	MAY OCCUR		CONDITIONS TO AVOID
	WILL NOT OCCUR	X	

## SECTION VII SPILL OR LEAK PROCEDURES

**STEPS TO BE TAKEN IN CASE MATERIAL IS RELEASED OR SPILLED**

Normal procedures for solid trash.

**WASTE DISPOSAL METHOD** Use a state or local agency approved land fill or incinerator. The cured material is not readily biodegradable and contains no significant percentage of material extractable in water so its effect on ground water in case of land fill disposal should be negligible.

## SECTION VIII SPECIAL PROTECTION INFORMATION

**RESPIRATORY PROTECTION (specify type)** Above the TLV: NIOSH approved for formaldehyde vapor and pneumoconiosis producing dusts.

VENTILATION	LOCAL EXHAUST for grinding and sawing	SPECIAL
	MECHANICAL (general) for lay up and curing rooms	
PROTECTIVE GLOVES Impervious rubber gloves polyolefin or neoprene type		
EYE PROTECTION Goggles for protection from dust in machining operation		
OTHER PROTECTIVE EQUIPMENT Long sleeve shirts and pants, recommend apron be worn for lay-up operations, wear clean clothes daily, resin contaminated clothes could promote dermatitis.		

## SECTION IX SPECIAL PRECAUTIONS

**PRECAUTIONS TO BE TAKEN IN HANDLING & STORING** Store the uncured prepreg at 40°F or less. Keep the uncured material away from sources of ignition. Wash hands before eating or smoking - DO NOT store food in work area.

Subject: Supplier's Material Safety Data Sheets (MSDS)

Dear Ms. Ward:

In response to your MSDS request letter of June 24, 1983, I would like to make a clarification regarding our use of the generic name for a substrate in our MSDS in place of using the specific part number for that material. Such an example were the MSDS's I sent to your associate, Ms. Rebecca Lally, on June 2, 1983. From your June 24 correspondence request:

DAC No. DMS 2055    CPH-2207-7781 (Type 1, Grade A)  
                          CPH-2207-8800 (Type 2, Grade A)  
                          CPH-2207-1582 (Type 3, Grade A)

This directly translates to our product MSDS of:

CPH-2207/Woven Glass

In this case the generic substrate is: "Woven Glass". The following part numbers you listed in your MSDS request, 7781, 8800 and 1582 all stand for Woven Glass, the only difference is in the type of roving (weave) that is utilized. For the purpose of industrial hygiene, good practice and safety concerns, you treat all three of these woven glass rovings the same. Thus, this is the reason why we use one generic name substrate MSDS to cover several substrate part numbers which contain the same formulated resin polymer code, i.e., CPH-2207.

Regarding the information listed in brackets in your June 24 request, i.e., (Type 1, Grade A) etc., this information is an internal Douglas Aircraft Company designation and has nothing to do with the chemical formulation of the resin polymer or the substrate material that was impregnated and should be disregarded for our purposes.

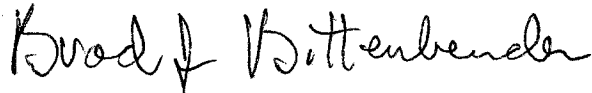

SP
